

SMARTER SUPPORT FOR LEARNING

AI'S ROLE IN CURRICULUM TODAY

Students Need Help, but Can't Always Get It

Today's classrooms demand more from students. They must absorb complex material quickly, often with limited support. What if students had a tool that delivered content while immersing them in inquiry and exploration, allowing them to take ownership of their learning?

The Current Problem

Students get stuck during lessons with no immediate support available.

Teachers aren't available at the exact moment help is needed.

Many students disengage or abandon tasks before seeking assistance.

Online learning works best when support is timely, aligned, and accessible in the learning environment itself.

Supporting Research

60% of students reported **improved soft skills**, such as teamwork and time management, with **online learning** (Devlin Peck Report).

85% of students reported **improvement in critical thinking and problem-solving skills** through online learning (Devlin Peck Report).

60% of teachers said students **struggled** more to **understand online content** (GAO Report GAO-22-104487).

64% of students report **difficulty** in staying **focused and motivated** online (Axon Park Study).

What Students Actually Need

Support that Keeps Learning in Motion

Students benefit most from:

Instant feedback when confusion arises

Help that connects directly to their current lesson

Tools that fit naturally into their digital coursework

Traditional digital learning still relies on:

Passive environments where students wait for help

External tools or chatbots disconnected from instructional materials

Delayed teacher feedback

The Shift To AI-Powered Learning

Key Principles for Effective Educational AI:

- **Promotes deeper thinking:** AI guides students to explore ideas and think critically without giving answers.
- **Content-aware responses:** Answers grounded in academically vetted content.
- **Consistent access:** Support available anytime students need clarification or reinforcement.

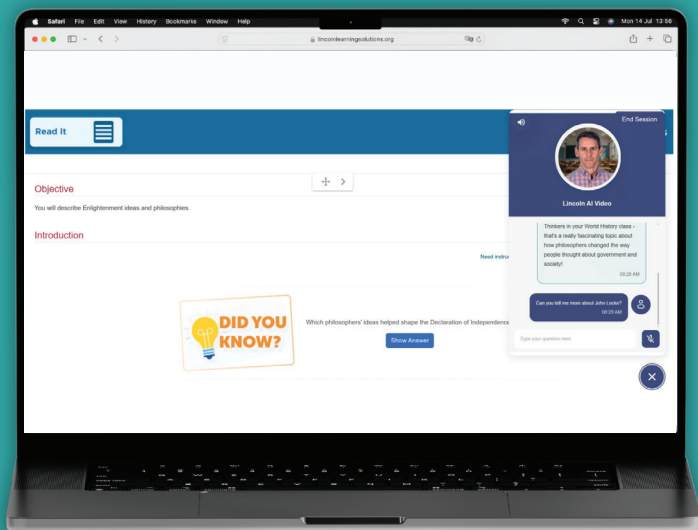

Introducing Lincoln AI

Smart Support Where Learning Happens

Lincoln AI empowers students to ask questions via text or voice-based chat whenever curiosity strikes. Smart support guides them through content, helping them explore concepts and deepen their understanding.

A student-centered learning companion.

How Lincoln AI Enhances the Student Experience

In-Lesson or Stand-Alone Support

Students using Lincoln Empowered courses receive in-lesson support with the Learning Assistant while any student can use Linc the Learning Coach for guidance.

Two Modes of Interaction

Students choose between text or voice-chat experiences based on their preference.

Content-Aligned Responses

Every interaction is powered by Lincoln's curriculum and aligned educational best practices.

Supports Learning, Not Assessment

Lincoln AI is never used for grading, testing, or student data collection.

Responsive and Always Available

Students no longer have to wait or disengage. They can continue learning with the support they need.

"Lincoln AI helps bridge the gap between asynchronous learning and real-time student support."

—Charlie Thayer, Chief Academic Officer of Lincoln Learning Solutions

Lincoln AI Strengthens Learning in Meaningful Ways

Deeper Understanding of Course Content

Students receive timely, curriculum-aligned explanations that clarify key concepts right when confusion happens.

Reduced Learning Delays

Instead of waiting for teacher feedback, students get immediate support, helping them stay on track and continue learning without interruption.

More Engaged Learners

Conversational prompts and content-specific guidance help students reflect, respond, and stay actively involved in their lessons.

Lincoln AI enables a more connected, responsive, and proactive learning experience by providing immediate support exactly when students need it.

Why Choose Lincoln Learning Solutions?

20 Years of Innovation in Digital Curriculum

200+ EK-12 courses trusted by schools, districts, & homeschool families nationwide

20+ years leading the way in digital learning innovation

Seamless LMS delivery with teacher support & dedicated partnership care
